Hyderabad, Telangana

## DreamWorks Animation Talk + Workshop

Ever looked at movies like 'How to Train Your Dragon', 'Kung Fu Panda', 'Shrek', 'and Madagascar', etc and thought: how do they create these wonderful pieces of art? The illusion of depth, motion, vivid colors, seamless transitions and more. Worry not, for this ATMOS; we have something amazing in store for you. We bring to you a presentation and a hands-on workshop for you by DreamWorks Animation - Bangalore studio, the same company that brought you the above mentioned movies.

There will be a presentation on the topic "Technology in Animation Film Making - A Sneak Peak", where you get to witness the skills required to work in the animation industry. Get to know the opportunities available for you in DreamWorks Animation Studio, India.

This will be followed by a hands-on workshop on the topic "Creating Interactive 3D Graphics using WebGL". The participants will get a flavor of the tech in the animation field. You get to use WebGL to explore the fundamental components of an interactive 3D scene. Explore the exciting world of animation movie making using primitives, cameras, lights, shaders and the WebGL renderer and JavaScript's three.js library.

Prizes: Participants successfully completing the workshop will get a completion certificate and the winners and runners-up will receive certificate of merit, DreamWorks Animation merchandise and a consideration of an internship (depending on the availability of slots).

**Registration Fee : FREE**
