Fastrack Automobile Workshop

FTAW is a two day Workshop program focused on giving an outreach to the participants about the latest technological developments in automobile industry. One can practically explore innovation involved in this field right from the beginning stages to the present age.

The uniqueness of the program is that one can learn directly from automobile industrially trained experts form reputed original equipment manufacturers [OEMS] and research organizations and get insights of their vision. Their realizations and experience with the present technology gives one the right platform to get inspired and innovate effective methodologies for a technology which would prevail tomorrow and even day after.

Our elegant curriculum has been carefully designed to suit our mission and do justice to each and every person gaining from it. Great amount of care has been taken to bring down the complexities involved in real automobile world to an easily understandable manner. One would have a great time and fun participating in our exhaustive sessions with continuous hands on practical experience.
